

## **WFC Statement of Clinical Objectives – Our Purpose**

*This statement is so that you, our patient are aware of what we do and what we do not do in this office. We wish to clearly communicate our gentle approach of Chiropractic, to healing and to those we serve. In reading this may you be aware of our responsibilities and your responsibilities in this relationship, and base your health care decisions upon clear communication between us.*

### **The following concepts are central to the way in which we practice Chiropractic:**

- The purpose of the Chiropractic adjustment is to reduce interference to the nervous system, resulting in improved communication and function within the body. This optimizes an individual's ability to more fully express their healing and life potential.
- Everyone, in spite of specific symptoms or ailments, can benefit from a spine and nervous system which is more flexible and adaptable, and less inhibited by vertebral subluxations.
- We recognize that there is a creative intelligence within each individual that not only keeps that person alive, but also coordinates, repairs, renews and heals every cell in the body. This is the true agent of healing within the body.
- We recognize that the nervous system is the main coordinating system and avenue of communication within the body for the expression of this innate intelligence.
- The spinal column serves to protect the nervous system at the spinal level, while allowing for flexibility in movement and nervous system response.
- Subluxations of the spine (vertebral subluxations) are an interference to the proper functioning of the nervous system.
- Symptoms are not only a sign of illness, but may serve to alert you of the need for change.
- Specific locations of symptoms do not necessarily correlate to specific locations of subluxations needing to be adjusted. Severity of symptoms does not necessarily correlate to severity of subluxations.
- As spinal adjustments help a body normalize, the body's chemistry may change. You should seek your physician's consult regarding potential alteration of medication levels. Medication levels for a non-flexible body, stuck in sickness, are not the same for a body on the road to wellness
- Consistent with these concepts, we choose to help an individual member of this practice achieve a greater level of wellness, elasticity, personal growth, and development through the adjustment of spinal subluxations.

**By my signature below, I acknowledge that I have read and understand the contents above.** I understand that the spinal adjustments in this office are not a replacement for any form of diagnosis or treatment offered by other types of practitioners. I understand this office offers Chiropractic as a form of wellness care, not as a treatment for a particular symptom to promote the natural mechanisms for self-healing within the individual.
